

## Project title : ASSAI - Environmental and Social Due Diligence of a company on its açai value chain in Brazil

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Brazil		Value chain expertise and E&S assessment	Proparco, CONFIDENTIAL	June 2024 - July 2024

### Project's goals and results

#### Main goals

Proparco finances a company in Brazil. Proparco and the company requested the services of Nitidæ to carry out Environmental and Social Due Diligence of the company.

#### Specific objectives

**OS1.** Evaluate the company's performance against the national and international requirements, on labour, health and safety, social and environmental "E&S" issues; and, if necessary, to determine improvement measures.

**OS2.** To extensively assess the company's supply chain sustainability and map their supply scheme.

**OS3.** Evaluate the environmental impacts of the processing and collection of açai as well as the working and living conditions of producers/collectors.

**OS4.** Assess the capabilities of the company's teams and processes to manage a sustainable supply of açai.
